

# Terrarium

All you need are:

- A soft drink bottle
- Pebbles
- Old, clean cloth or spargum moss
- Soil
- Seeds

Terrarium's don't need much water – they trap it in with their narrow necks. If the soil is dry you can water it. If there is water among the stones at the bottom of the terrarium don't water it for a few days.

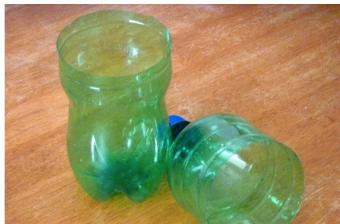

You can buy soil and plants, or literally use whatever is lying around in the back yard – see what is waiting to grow there right now! You can grow loads of things in a terrarium, even your own vegetables!

## How to build your own Terrarium

*A*

Start with a soft drink bottle, cut in half

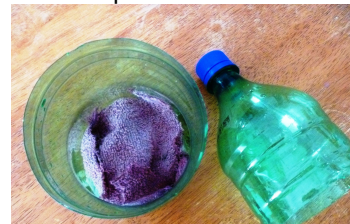

*B*

Put some gravel in the bottom, to measure water

*C*

Place some cloth or Spagnum to keep soil out of rocks

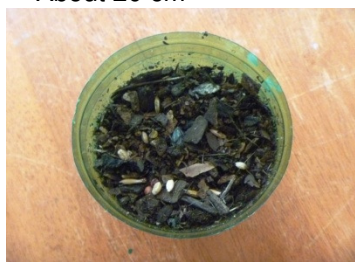

*D*

Press down the cloth

*E*

Cover it with soil, About 20 cm

*F*

put in a few seeds and place the top back on
