## Creating Science – hands on science activities and experiments for everyone! (\$40, 5 for \$165)

This book does so much more than teach the simple, fun, engaging concepts of science to kids. This book also highlights the ways in which such knowledge came about; who said it, how they convinced us, as well as what they said. It's time we got to know science a little better, inside and out! And, as an added bonus, teachers and parents will appreciate the free online teacher notes and lessons. We not only create science, we create scientists! ISBN: 978-0-9923294-19.

**A book of real science activities that are tried and tested for ages 4 to 14!**

## Space Chase!

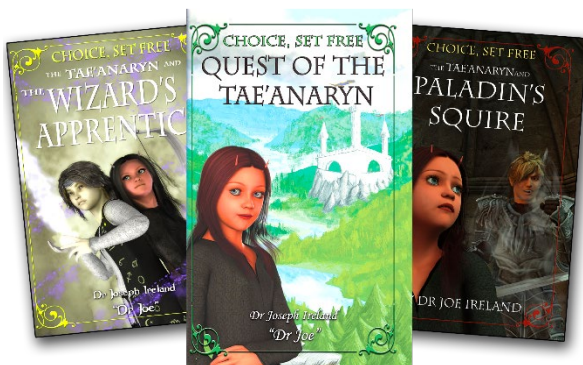

*Science fiction adventure that actually teaches real science*  
(Books 1-4 = \$20 each, \$70 full set)

A class freak, a science geek, and a girl from outer space. How much trouble can they get in? They're wanted by the Australian government, Coebri space pirates, and a silver man from the Universal Unity. Life is never more complicated than when you have to choose between freedom... and friendship... ISBN 978-0-6484941-26.

## Quest of the Tae'anaryn

*High fantasy mystery, Lexile 750+ (\$25 each for books 1-5, \$125 first 6, \$200 all 8 books)*

*A deeply philosophical fantasy epic,  
For all the questions **science cannot answer!**  
Bullying, being, and defining your place in the world...*

**William** (13) I really liked your book, The Tae'anaryn and I hope you make a sequel to it as soon as possible. I also liked how you gave some nice advice about bullying. **Santi** I loved the book of the Tae'anaryn!! It's the best book I've read so far in my life!! Dr Joe I think you should make a sequel! ISBN 978-1-9216323-27 and 978-0-9923294-88.

***Each book comes with an interactive and educational program, developed and presented by Dr Joe - science education specialist. Known as one of Queensland's most accessible and engaging presenters with over a dozen years' experience in making learning fun!***
